SUMMARY

Computer Science student with hands-on experience leading a small Agile team through the development of a Java/JavaFX application from concept and design to an event-driven prototype. Currently building a Rust/Godot system while exploring software architecture, self-hosted tools, and local AI-assisted development workflows. Seeking opportunities to contribute to real-world software and technical projects.

PROJECT

Arithmerogue — Java, JavaFX, MVC, Maven, JSON

Jan 2026 – Present

Team Project / Independent Continuation

- Led a small Agile team in developing the original Math Coach prototype, featuring customizable user profiles, configurable arithmetic sessions, timed gameplay, and detailed performance statistics.
- Designed the application around an MVC architecture with persistent JSON-backed profile and session data.

EDUCATION

B.S. Computer Science

Jan 2025 – Present

University of South Alabama

Mobile, AL

Expected: **December 2028** | GPA: **3.4**

PROFESSIONAL EXPERIENCE

Biomedical Equipment Technician

Mar 2020 – Oct 2023

US Army

JBLM, WA

- Managed a high-volume maintenance workload of **50–100 PMCS actions per month**, balancing scheduled inspections with repair demands to keep medical equipment available for field deployment.
- Supported a field hospital biomedical shop responsible for roughly **5,000 medical devices**, performing extensive testing and calibration to ensure equipment readiness and patient safety.
- Instructed hospital personnel on new medical equipment during two fielding events, translating technical procedures into practical user training.

Search Engine Evaluator

2018 – Feb 2020

Kelly Connect

Mobile, AL

Tier 2 Technical Support Specialist

2016 – 2018

Support.com

Mobile, AL

- Performed Tier 2 troubleshooting in a high-volume, KPI-driven environment, using elevated support tools to resolve issues remotely or determine when field technician dispatch was required.

SKILLS

Languages

Java, Rust, Python, C, C++

Frameworks

JavaFX, Godot, GDEXTension

IT

Basic networking, TCP/IP, DNS, DHCP, Port Forwarding, Server Hosting

Tools

Git, GitHub, VS Code, Linux, Docker, Podman, Ollama, Continue

Concepts

OOP, MVC, Agile, JSON

Computer Systems

Hardware/Software Troubleshooting
